

OKSIR is Hiring!

**Field Monitor
FT, Seasonal Position
Oliver, BC**

**Resumes Due Immediately
Short Term until end of August**

About Us:

We are an environmentally-friendly control Program for one of the biggest pests of apple and pear trees—the codling moth. Since the Program started more than 20 years ago, the amount of pesticides used in the valley against codling moth has dropped by 96%. Our Program breeds and sterilizes codling moths at our state-of-the-art facility in Osoyoos, and we release them into orchards where they mate with wild moths to prevent the population from reproducing. Our Program also provides trapping and monitoring, education, and enforcement services for the growers.

We require many seasonal employees throughout the valley to help us deliver our services. Our Program offers a chance to make a difference for our farmers and our environment.

Field Staff work outside in orchards and urban areas. Seasonal positions are perfect for people who want the flexibility to make some money while enjoying the region's summer offerings before they start winter work, go back to school or head south for warmer climates.

About You:

You enjoy working outside and have an eye for detail. You can follow instructions, work independently or as part of a team. You are a responsible driver and employee that will take care when driving to and through orchards to deliver moths. You are comfortable operating an ATV, are able to lift up to 50lbs and stand/walk for extended periods of time.

Current Positions Available:

Field Staff – Full-time

Outside, seasonal

5 days on and 2 days off.

Hours of work are from 8:00 to 4:00, with ½ hour unpaid lunch.

Wage \$14/hour.

If this sounds like a good fit for you, please submit your resume to jobs@oksir.org.
